Art Unit: 1616

Claims 1-24 are pending in this application which has been filed under 35 USC 371 as a national stage application of PCT/US01/23880, filed July 30, 2001. This application lacks unity of invention under 37 CFR 1.475 (MPEP 1850, 1893.03(d)).

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, 11, 12, drawn to compositions comprising maltable grain (claim 2: wheat, barley, rye) and a root retardant comprising corn steep liquor (CSL) or MRS medium and lactic acid (claim 11), and methods of malting a maltable grain composition in the presence of a root retardant.

Group II, claim(s) 8-10 and 13, drawn to a method of making a fermented beverage by malting grain and root retardant (CSL) then fermenting it (claims 8, 9, 13), and the beverage made by the method.

Group III, claim(s) 14-24, drawn to methods of making and using a preemergent herbicide by adding additional lactic acid to a steep liquor

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and III are drawn to plant growth regulating

Art Unit: 1616

compositions while Group II is drawn to a beverage. Groups I and III differ in that I is a root retardant comprising maltable grain, while Group III does not make use of grain, but liquor products.

The following claim(s) are generic: 1-24

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the fact that a steep liquor product may be used in a grain product, a fermented beverage, and a preemergent herbicide composition, does not render such divergent uses related as a single inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
